PROMOTION 2024 DNA&RNA PURIFICATION

DNA EXTRACTION KIT (SPIN COLUMN)

- High quality DNA - meet a variety of downstream applications, including PCR, qPCR, enzyme digestion, hybridization, etc.
- Fast - without separation of leukocytes, organic extraction or ethanol precipitation
- Simple - all nucleic acids can be obtained by direct digestion
- Wide applicability- handle a variety of liquid samples

RNA EXTRACTION KIT (SPIN COLUMN)

- Efficient DNA removal - one step RNA extraction can effectively remove genomic DNA
- High quality - one step RNA extraction reagent combined with silica gel column can obtain the highest concentration
- Fast - the whole extraction only takes 15-25 minutes
- Nontoxic - no toxic phenol chloroform extraction is required in the extraction
